

CMD & CTRL IS PROUD TO BE A
VETERAN-OWNED BUSINESS

CORE SERVICES

Digital Forensics and Incident Response

Everyone would like to believe their security posture is beyond reproach, but the reality is there are always factors beyond foresight that allow for bad actors to infiltrate. When those inevitabilities come to pass, we are prepared to spring into action with our Digital Forensics and Incident Response Professionals.

Security Operation and Management

CMD & CTRL provides organizations with highly skilled and specialized cybersecurity professionals who will apply their wealth of knowledge and analytical mindset to help detect, contain, analyze, and mitigate security risks to maintain the network's integrity.

Security Engineering

Our Security Engineers handle the administration of security tools and processes for our clients. They use their advanced knowledge and expertise to build digital security protocols, operate and maintain cyber security systems, and manage an IT security infrastructure for their organizations.

CYBERSECURITY EXPERTISE AND EXPERIENCE THAT YOU CAN RELY ON

CMD & CTRL is proud to be a veteran-owned business that strives to provide our clients with the best security program in the industry. We will do this by consistently delivering the top security industry talent and business practices available, every time at every interaction.

CMD & CTRL is owned and operated by Co-Founders, Jacob Villanueva and Evan Darrow.

Jacob brings deep expertise in cyber security operations and government contracting with nearly 15 years of working in directly related fields for contractors and for large tech companies directly.

Evan brings 15+ years of Enterprise sales experience with the last 11+ being for one of the nation's largest technology resales, services, and consulting firms. Jacob and Evan are experienced in both the operations of large-scale security practices as well as the technologies that make up a modern enterprise security program.

This experience will be deployed to our customers' benefit when they do business with CMD & CTRL.

LET'S GROW TOGETHER

COMPANY PRINCIPALS

Jacob Villanueva - CEO

- Jacob has 14 years of Cybersecurity experience working specifically in Government contracts.
- Jacob began his Cybersecurity career when he joined the Army National Guard and was assigned to one of the few Cybersecurity units.
- Jacob has worked across many cyber defense areas, from Risk and compliance to Digital Forensics and Incident Response.
- Jacob has been successful in building and maturing multiple Security Operation Centers across different Government agencies.
- Jacob has held multiple SME and leadership positions across multiple Government contracts. He was the SOC Manager at a DHS SOC and the Director of Cybersecurity on a contract supporting a federal client.

Evan Darrow - COO

- Evan has 12 years of experience in Enterprise IT consulting, delivering solutions including IT services and infrastructure design and sales.
- Extensive experience advising the C-Suite at large enterprises.
- Experience consulting with CISO's to lead security process and framework-based optimization projects.
- Strong knowledge of cloud infrastructure and security, including major platforms such as AWS, GCP, and Azure.
- Proven track record of leading successful IT transformation projects.
- Excellent communication and interpersonal skills, with experience presenting to both technical and non-technical audiences.
